

## **Atoms NG By Six Echo Studios Is A 21<sup>st</sup> Century Update To The Fast-Paced Classic Strategy Game**

Chain Reactions & Critical Mass On Your iOS® Are Not Only Fun, But Awesome!

Northern Ireland, November 6<sup>th</sup> 2014: Independent games developer and publisher Six Echo Studios is proud to announce the worldwide release and availability of **Atoms NG** (Next-Gen) to the iOS® digital app store. Compatible with all iOS® devices running iOS6+, **Atoms NG** is a FREE download featuring a 21<sup>st</sup> century modernised update to the critically acclaimed 1992 Amiga predecessor from the same developer.

**Atoms NG** is an addictive turn-based strategy game for 1-4 players, with simple but deep strategic gameplay a little like Othello or Go.

Players take turns to place Atoms of their color in to the live-action 2D playing grid. Atoms can be placed in empty cells or cells already containing one of the player's own Atoms. When the number of Atoms in a cell exceeds that cell's maximum, the cell explodes and its Atoms jump to every neighboring cell, creating chain reaction of explosive atomic events that sweep the board! Jumping Atoms instantly re-color all Atoms in target cells to their own color, and the first player to re-color all their opponents' Atoms wins!

With its immersive and addictive gameplay, local or online play, four levels of challenging AI, intuitive controls and strategic brilliance, **Atoms NG** is a great addition to any portfolio of favorite games.

**Atoms NG** is a FREE download sponsored by in-app advertising, and contains one-time in-app purchases to remove all ads and unlock premium features. Download your copy today and *go full atomic!*
